THE BOMBARDIER J-5

THE ALL-PURPOSE TRACTOR

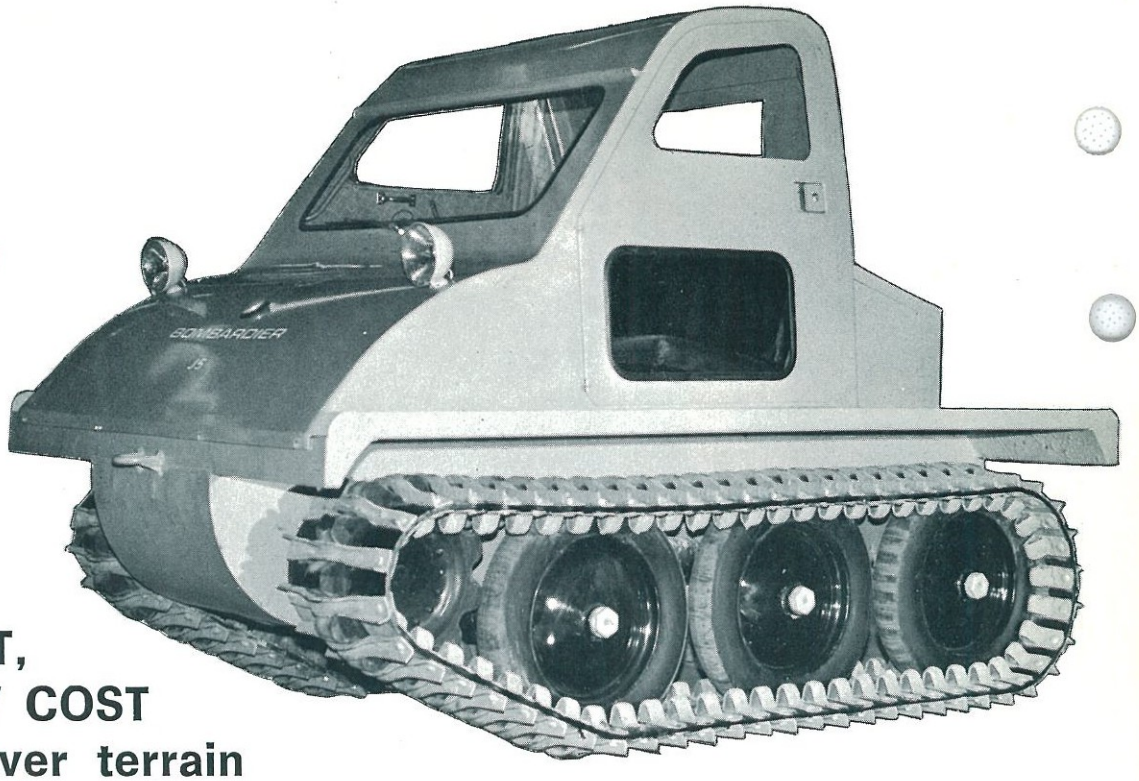

BOMBARDIER LTÉE/LTD.

WWW.SAFETYONEINC.COM

built for the tough jobs on difficult terrain

The J-5 tractor has the traction of a crawler with the speed of wheels to give you unequalled versatility.
It provides FAST, EFFICIENT, LOW COST transportation over terrain that stops other vehicles.

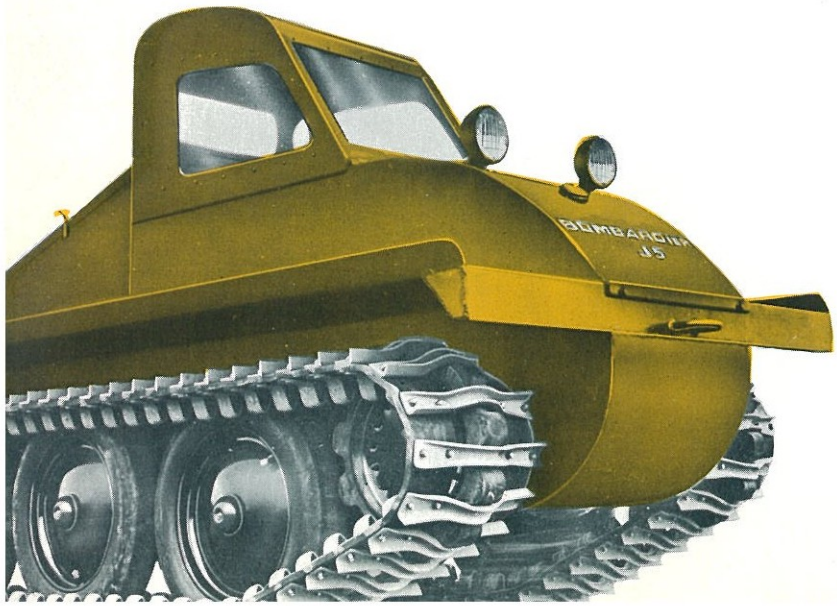

WWW.SAFETYONEINC.COM

Select the model you need for your job: the overhead canopy (shown on the front cover) gives the operator an unobstructed view and provides protection in logging jobs or in tropical climate.

Three-man cab (shown above) fully enclosed for warmth and comfort.
The operator's fully enclosed cab with flip-up top; (shown below) side glasses as well as complete top are easily removable.

With the J-5 tractor you get low initial cost, economical operation and minimum maintenance plus versatility

. . . for logging, farn surveying, trans

These features assure you of the best buy :

TRACTION : The combination of Bombardier's flexible suspension and rubber belted tracks assures continuous ground contact even on the roughest surfaces to give maximum traction in the worst conditions.

FLOTATION : The weight of the J-5 is distributed on the large track area and exerts a ground pressure of only 1.3 P.S.I. (Approx.). It will travel through thick mud, swamps and marshy land that stop other machines.

POWER : A 125 H.P. engine gives the J-5 plenty of reserve power for pulling out of tough places or operating in a higher gear. With speeds up to 20 M.P.H. the J-5 cuts travel time between jobs and increases work production.

STABILITY : Low center of gravity and continuous power delivered to both tracks give the J-5 tractor its earth-hugging stability.

DEPENDABILITY : The J-5 has been proven dependable for difficult operations over the toughest terrain around the world. This assures outstanding reliability so important for operating in remote areas. Each tractor is built under strictest quality control by Bombardier and is backed by 40 years of engineering know-how and field experience with soft soil and snow vehicles.

Plowing or pulling a disc harrow in that soft spongy field requires the flotation and pulling power of the J-5.

Spreading manure or hauling fodder to ranch cattle in winter are easy jobs.

WWW.SAFETYONEINC.COM

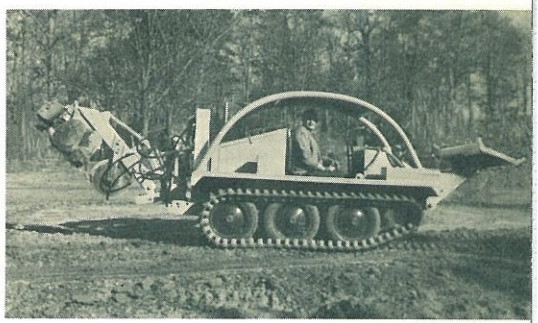

When a forest fire breaks out, the dependable J-5 . . .

gets the men and equipment to the fire lines quickly;

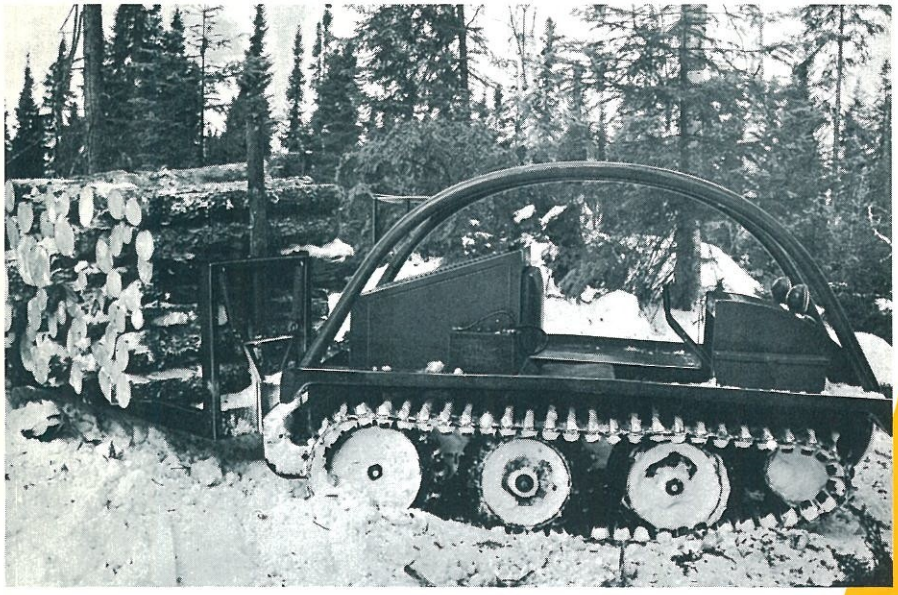

it can pull a fire plow to make a fire break in record time

and be off to another site travelling at top speed through the woods.

ng, ranching, fire-fighting, conservation, construction, prospecting, ission and pipe line inspection — any use . . .

Equipped with the TS trailer, the J-5 has long been the pulpwood contractor's favorite to yard 4' pulpwood out of dense bush or spongy swamps that stop other logging vehicles :

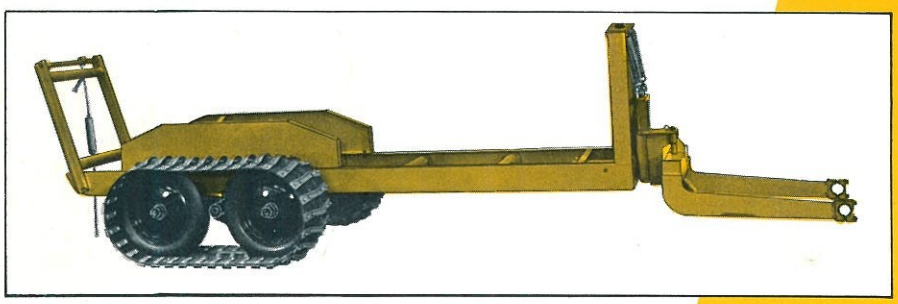

specifications J-5

Length of frame	9'
Overall length (with front tow hook)	9'4"
Overall width	64"
Height with head protector	74½"
Height with 3 man cab	75½"
Height with 1 man cab	71"
Height less cab	55½"
Height of frame	31½"
Weight	4,000 lbs. (approx).
Ground clearance	12"
Speed	up to 20 m.p.h.
Turning radius	12'
Ground pressure	1.3 P.S.I. (approx).
Engine	Chrysler 6 cyl., 125 H.P. at 3,600 r.p.m.
Transmission	4 speeds forward, 1 reverse
Clutch	single disc.
Differential	controlled type, ratio 5.83 to 1
Frame	monopiece, toboggan type
Tracks	16½" wide
Track belts 5½" wide, endless reinforced with steel cable	
Wheels	6 with 4.50 x 16, 6 ply nylon tires
Sprockets	rubber reinforced with fabric
